Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4,5 ,6, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Geers (US 5999700).

Geers discloses a portable refrigerant tank heater system including a tank containing gas, a heater thermally attached to the tank for heating the tank, the heater having sufficient heating capacity to maintain pressure in the tank when gas is withdrawn from the tank; a power source with sufficient power to operate the heater; a sensor for providing a signal indicative of flow of gas from the tank; and a processor responsive to the sensor signal and communicating with the heater, the processor being configured to energize the heater with power from the power source when gas flows from the tank. It is noted that the use of the system at a remote oil industry site is just an intended use and does not serve to distinguish from the prior art. Further the use of the tank to contain propane or petroleum gas does not serve to distinguish.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3742

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Geers (US 5999700).

Geers discloses the claimed invention except the detection of the difference in temperature of the tank and the ambient. Geers discloses in the background of the invention that the use of pressurized tanks in cold weather is one of the reasons for the improvements. It would have been obvious to one of ordinary skill to control the heating elements based on the temperature difference between the tank and the ambient since it was contemplated in the disclosure of Geers.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
